Global Finishing Solutions provides the most comprehensive line of spray booths and finishing systems manufactured according to the highest standards in the industry. Complimented by state-of-the-art, flexible and cost-effective solutions, GFS is the preferred source for finishing process equipment. All GFS products are designed with the ability to produce a superior quality finish in the most efficient manner.

Committed to building quality environmentally compatible products, GFS provides total customer service before, during and after product delivery. We are professionals in consulting, design, engineering, manufacturing and installation, and we will ensure that each system meets the specialized needs and performance required.

QUALITY CONSTRUCTION

GFS Spray Booths feature a modular design. This approach offers the economy of a standardized line of spray booths while making available a variety of sizes and configurations to fit a broad range of finishing processes.

Energy-efficient components, high-efficiency heat systems, shadow-free lighting, and multiple configurable options to fit a broad range of finishing processes, allows you to choose the perfect booth for your unique operation. From large and complex systems to basic systems, GFS applies the fundamental logic of Solution-Driven System Engineering to custom fit your production requirements.

Booths are constructed of 18-gauge galvanized sheet steel. Panels are pre-punched, companion flanged and bolted on six-inch centers for easy fit and fast assembly. Rigidly reinforced with structural steel and the exterior flanges provide a smooth interior surface. Pre-coated white panels are available as an option.
