

Overhead trolley conveyors, floor conveyors, belt, chain, and flight conveyors are commonly used for transport purposes.

PROCESS

These modular factory-built convection type ovens operate at temperatures ranging from 100°F up to 600°F. Ovens can be heated with gas, fuel oil or electricity and are designed to move products through the heat zone using a variety of transport systems.

Convection Ovens

ISO Dynamic & Recirculating

APPLICATIONS

GFS provides equipment and services to customers who manufacture a wide range of products – automotive components, major appliances, office furniture, outdoor equipment to name a few.

- > Paint Drying and Curing
- > Powder Curing
- > E-Coat Curing
- > Autophoretic Curing
- > Dry-off and Dehydration
- > Heat Treating

Convection Ovens

Oven heat transfer design is available in both conventional Recirculating and ISO-Dynamic Flow technology. ISO-Dynamic heat transfer designs provide heating cycles 50% to 70% shorter than those required by conventional recirculating designs.

Typical Curing / Drying Cycles:

Application	Temperature	Conventional	ISO-Dynamic Flow	Time Savings
Powder Curing	375° F - 450° F	30 - 45 min.	8 - 20 min.	> 22 min.
E-Coat	350° F	30 min.	15 min.	15 min.
Liquid (water)	180° F - 250° F	20 - 30 min.	10 - 15 min.	> 10 min.
Liquid (solvent)	180° F - 350° F	20 - 30 min.	6 - 12 min.	> 14 min.
Autophoretic (Acc 800)	230° F	20 - 30 min.	10 - 15 min.	> 10 min.
Dry-Off (water)	250° F - 300° F	10 min.	4 - 5 min.	> 5 min.

GFS has over thirty-five years experience in designing and manufacturing industrial ovens and is recognized as a leader in heat transfer technology. For this reason we are committed to assisting our customers in solving specific finishing and heat processing challenges.

STANDARD FEATURES

ISO-Dynamic Oven

- > Structural Modular Steel Framing
- > Exterior Casing (16 ga.)
- > Interior Aluminized Skin (18 ga.)
- > Steel Headers & Jet Pipes
- > Air Blower(s)
- > Exhaust Fan(s)
- > Control Panel (NEMA 12)
- > Temperature Control Instruments
- > Combustion Safeguards (FM/IRI)
- > Gas Train (FM/IRI)
- > Ignition System
- > Burner
- > Burner Box
- > Prime & Finish Paint

Recirculating Oven

- > Structural Modular Steel Framing
- > Insulated Aluminized Panels (20 ga.)
- > Interior Aluminized Duct (16 ga.)
- > Recirculating Blower(s)
- > Exhaust Fan(s)
- > Control Panel (NEMA 12)
- > Temperature Control Instruments
- > Combustion Safeguards (FM/IRI)
- > Gas Train (FM/IRI)
- > Ignition System
- > Burner
- > Burner Box
- > Prime & Finish Paint
